HUMPHREY MACHINE CO., KEENE, N. H.

— MANUFACTURERS OF THE —

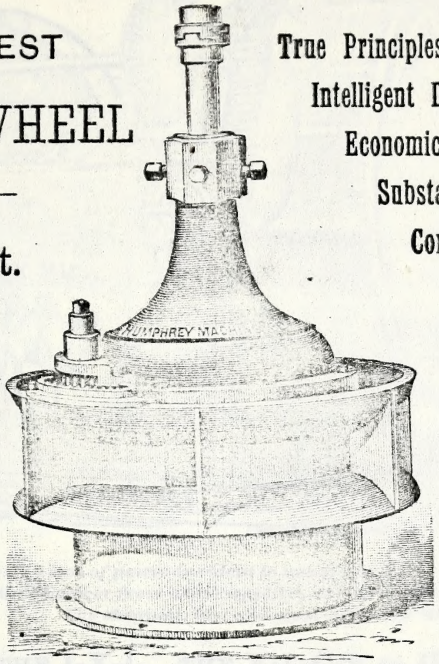

STANDARD I-X-L AND X-L-C-R TURBINES.

AN HONEST

WATER WHEEL

— WITH AN —

Upright Shaft.

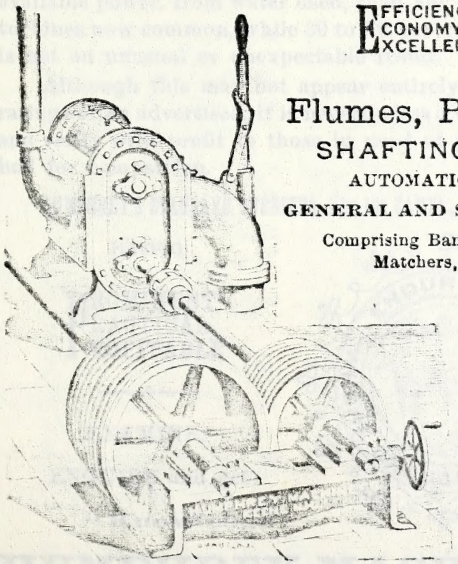

True Principles.
Intelligent Design.
Economic Proportions.
Substantial Structure.
Correct Action, and
Profitable Results.

THE **I-X-L** IS **X-L-NT**

THE **X-L-C-R** IS **UN-X-LD**

The I-X-L is especially serviceable on low falls where the horizontal shaft wheel does not apply, and for that purpose, it is decidedly the best power producer now in use, often making large gains in available power over other popular wheels; and in this it has no equal in any place, except the X-L-C-R shown on the other side of this leaf.

EFFICIENCY ECONOMY and EXCELLENCE FULLY GUARANTEED.

Flumes, Penstocks and Mill Work,

SHAFTING, HANGERS and PULLEYS.

AUTOMATIC COUPLERS FOR AUXILIARY MOTORS.

GENERAL AND SPECIAL WOOD WORKING MACHINERY:

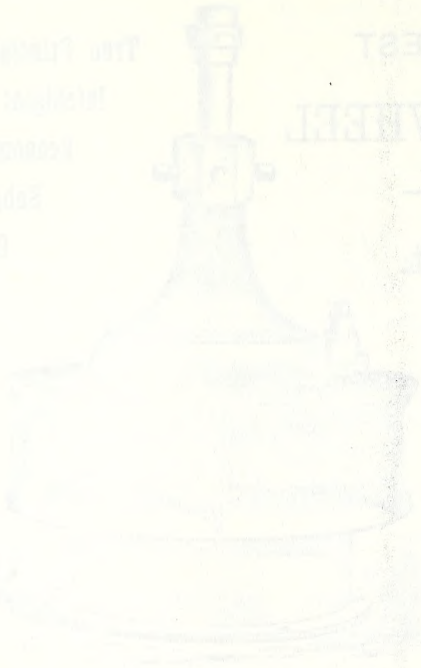

Comprising Band Saws, Saw Mills, Board Joiners, Planers and Matchers, Tub, Pail, Box, Clothes Pin and Shoe Peg Machinery, etc.—*Send for List.*

THE PROTECTOR PUMP.

The simplest, most substantial and effective Fire Pump made.
No frail or trashy parts to fail in time of needed service.
Throws more water with same power than other Standard Pumps now in use.

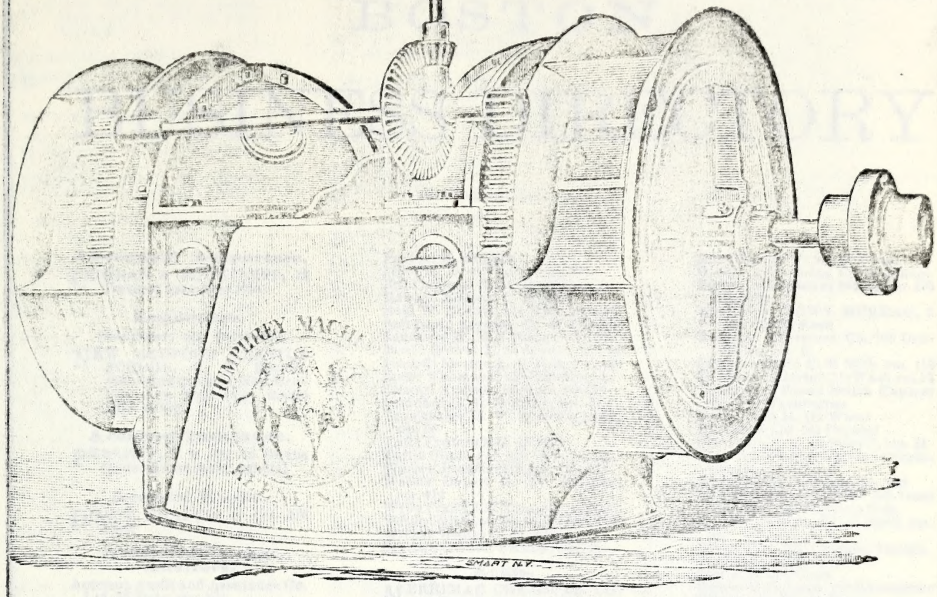

Traction Gearing, Hydrants, Valves, Pipe, Sprinklers, Etc., Etc.

THE BEST EQUIPMENTS FOR FIRE PROTECTION AND MOTIVE POWER.

GET THE BEST!

THE X-L-C-R OR STANDARD CIRCUMSHOT WATER WHEEL

Saves cost, annoyance and loss of power incident to use of gears.
Affords more available power from water applied, at full or part gate, than any other.
The cheapest, best and most desirable Water Wheel yet produced.

X-L-NT THE I-X-L. THE X-L-C-R IS UN-X-LD.

Designed and adapted to situations where economy of water is essential, and in accord with scientific principals, these Standard Water Wheels are manifestly superior to those of empirical development and will usually produce from 10 to 20 per cent more available power, from water used, than any of the overgorged small diameter class of turbines now common, while 30 to 40 per cent gain over some of the popular varieties is not an unusual or unexpectable result.

Although this may not appear entirely consistent with the purported efficiency ratings often advertised, it is nevertheless a well determined fact, that we can guarantee and verify with profit to those in need of power wherever proper conditions may be had for comparison.

HUMPHREY'S STANDARD TURBINES, like the CAMEL, have "ENDURANCE WHERE DROUGHT PREVAILS."
